Arrival

Slow is smooth. Nobody wins a prize for the fastest setup.

Before you pull in

- ☐ Walk the site: look up, along both sides, and down.
- ☐ Room for slides, awning, door, steps, and the exit path.
- ☐ Cord, hose, and sewer hose will reach the hookups.
- ☐ Pedestal checked with our protection device before unhitching.
- ☐ Driver and spotter agree on signals. Lose sight, stop.

Our setup order (from our manuals)

4.

5.

6.

7.

Before settling in

- ☐ Breaker off before plugging in; protection device shows OK.
- ☐ Regulator on, valves set, connections checked for leaks.
- ☐ Water heater full before it’s turned on.
- ☐ Campground rules and storm shelter known.

Departure

Departure isn't arrival in reverse. Some systems need power to retract.

The night before

☐ Route, forecast, and checkout time confirmed.
☐ Dump plan set, with time for a line at the station.

7.

Final walkaround

☐ Cabinets, appliances, doors, and loose items secured.
☐ Slides, awning, antenna, steps, and jacks in travel position.
☐ Water, power, and sewer disconnected, stored, and capped.
☐ Hitch or tow connection, brakes, and lights checked.
☐ Chocks and blocks picked up after the rig is secured to move.
☐ Tires, mirrors, compartments, and clearances checked.
☐ Everyone aboard and buckled; the site is clear; look up.

Interrupted? Go back to the last step you know you finished.
