Trip and Shakedown Planner

Make the first outing close enough to help and simple enough to practice. Confirm access with the campground and use your verified vehicle dimensions.

Destination, reservation, trip dates, and campground contact

Site size, hookups, arrival window, and late-arrival instructions

Route, clearance checks, fuel stops, rest breaks, and backup stop

Weather check, campground emergency plan, and suitable shelter

Before departure

- ☐ Unresolved maintenance issues have been addressed.
- ☐ Tires, lights, towing equipment, and loads have been checked as instructed.
- ☐ Driver and spotter have agreed on signals and when to stop.
- ☐ Manuals, contacts, route details, and checklists are available offline.

Skills and systems we will practice during this stay

Trip budget and backup plan if we need to return early

Use the RV and equipment manuals to create your operating sequence. Stop moving if the driver loses sight of the spotter or anyone signals stop.
