Arrival Checklist for My Rig

These are verification prompts, not a universal operating order. Write the sequence required by your RV, hitch, leveling, and slide instructions below.

RV, site, date, and manuals or procedures used

Inspect before entering

- ☐ Assigned site, access, slope, ground condition, and exit path are suitable.
- ☐ Overhead and side clearance allow for the actual RV and extended equipment.
- ☐ Pedestal, water, and sewer locations suit our connections.
- ☐ Driver and spotter agree on the approach, signals, and stopping points.

Our equipment-specific operating sequence

Order	Action and manual reference	Done
1		
2		
3		
4		
5		
6		

Before settling in

- ☐ Rig is secure and setup is complete in its specified order.
- ☐ Correct utility connections are established; accessible connections checked.
- ☐ Water-heater readiness and moving-equipment clearances are confirmed.
- ☐ Campground rules, weather plan, and suitable shelter are understood.

Site issue or follow-up action

Chocking, unhitching, leveling, stabilizing, and slide operation vary by equipment. Stop and seek qualified help if the correct sequence or connection is unclear.
