Departure Checklist for My Rig

Use your equipment's required sequence. Some systems need power during retraction, so departure is not simply arrival in reverse.

RV, date, next destination, and person confirming completion

_____

Our equipment-specific operating sequence

Order	Action and manual reference	Done

5		

Final walkaround and interior check

- ☐ Loose items are secured; cabinets, appliances, and doors are latched.
- ☐ Slides, awnings, antennas, steps, and supports are in travel positions.
- ☐ Water, electrical, and sewer connections are stored and capped as applicable.
- ☐ Hitch or tow connection and required braking equipment pass their checks.
- ☐ Chocks and leveling aids are retrieved only after the rig is secured for movement.
- ☐ Tires, lights, signals, mirrors, compartments, and visible clearances are checked.
- ☐ Everyone is accounted for and in the proper travel position.
- ☐ The site is clear of belongings and trash; the route out is clear.

Unresolved item that must be addressed before moving

_____

If interrupted, return to the last completed checkpoint and verify where you are. Do not mark an unresolved item complete simply to stay on schedule.
